INFORMATION DISCLOSURE STATEMENT

Dear Sir:

In accordance with 37 C.F.R. § 1.56, 1.97, and 1.98, Applicant hereby submits an Information Disclosure Statement for the above-identified application.

This Information Disclosure Statement is being filed in accordance with 37 C.F.R. § 1.97 (b)(1) and/or 1.97(b)(3). As such, it appears that no fee is required for consideration of the Statement by the Examiner.

Accompanying this statement is Form PTO-1449, on which the references being submitted herewith are listed, as well as a Statement of the Basis of Relevance of The Non-Translated Foreign References for applicable references. A copy of each of the references is enclosed.

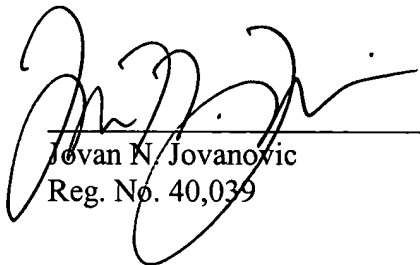

This Information Disclosure Statement shall not be construed to be an admission that the information cited in the same is, or is considered to be, material to patentability under 37 C.F.R. § 1.56. As such, neither this Statement nor the accompanying documents are intended to take the place of the Examiner's independent search of the prior art and independent evaluation of the prior art and other information, including that brought to the Examiner's attention with this Statement.

If any other charges or fees must be paid or credited in connection with this communication, they may be paid or credited out of Deposit Account No. 50-2131.

Respectfully Submitted,

Dated: _____

**STATEMENT OF THE BASIS OF RELEVANCE OF THE NON-TRANSLATED
FOREIGN REFERENCES**

Dear Sir:

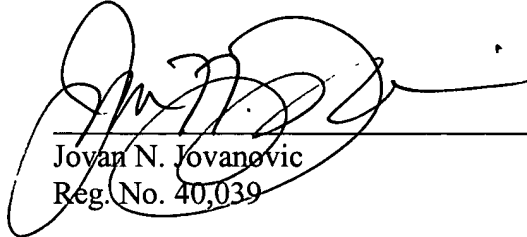

In accordance with 37 C.F.R. § 1.98 (a)(3)(i), Applicant hereby submits a Statement of the Basis of Relevance of the Non-Translated Foreign References for the above-identified application.

<u>Publication Number</u>	<u>Publication Date</u>	<u>Basis for Relevance</u>
EP 1340709	November 20, 2002	The transporting system for especially motor vehicle body parts (6) between stations has a lifting and lowering device (2), at least two construction elements of which at least in a lifting position are arranged in Y-form. The lift application point (H) of the lift drive (18) is installed on the holder (4) for the body part or in the region of a connection point (A) of the holder to a construction element connected to the holder and preferably in the region of 0 to 25 per cent the length of the longest construction element connected to the holder.
EP 1378480	July 3, 2002	The transport vehicle transports bodywork (6). It consists of at least one movement unit (3), at least one receiving device (4) and at least one raising and lowering device (2) having rigid structural elements (7, 8) pivoted to each other. At least two of the structural elements are Y-shaped in at least one stroke position.
DE 19819993	May 5, 1998	The device has several sensors to determine its safe condition and has unit to recognize and process security relevant states and to stop or switch off moving parts of the device.
EP 1106563	November 22, 2000	Device has upper frame (4) attached to the vehicle and lower frame (7) at distance beneath it, held on it by traction elements (9a-12b) and vertically movable by lifting drive. Belt or cable traction elements are angled to the vertical in one section in which they pass between the lower and upper frames to stabilize the position of the lower frame, for performing work on a load (13) attached to lower frame.

If any other charges or fees must be paid or credited in connection with this communication, they may be paid or credited out of Deposit Account No. 50-2131.

Respectfully Submitted,
